- **Tools : VS code │ Figma │ Netlify │ Vercel │ Git and Github**

PROJECTS

Amalia Medical Camp - A Full-Stack Medical Camp Management   **Live Link   Client Side   Server Side**

Tech - React , Tailwind , Express js , Mongodb , Tanstack Query, Axios, Firebase Auth

- Developed a role-based dashboard system enabling Participants, Admins, and Healthcare Professionals.
- Implemented features including Home, Available Camps, and Dashboard, facilitating seamless user interaction.
- Users can update profiles to select roles; Admins manage camps, while Participants join and pay for camps using React Stripe.
- Users can calculate their BMI and input blood pressure readings to receive immediate assessments

JESTBLOG - Revolutionizing Blogging Platforms   **Live Link   Client Side   Server Side**

Tech - React , Tailwind , Express js , Mongodb

- Displayed recent blogs, blogger profiles with follow functionality, and newsletter subscription.
- Users can adding, viewing, update and interacting with blogs, including commenting, sort blogs by category, and wishlist management.
- Created a feature-rich blog display page showcasing blogs based on their long descriptions in a react table

WeavePDF- Basic PDF Application(Collaboration Projects)   **Live Link   Client Side   Server Side**

Tech - React , Tailwind , Express js , Mongodb , Tanstack Query, Axios, Firebase Auth

- This project will help the user to convert document such as markdown to pdf, word to pdf, Text to pdf, merge & split pdf so on. I implement convert image to pdf , draw signature, dashboard functionality.
- Implemented image to PDF conversion feature allowing users to convert multiple images into a PDF file.
- Developed a dashboard functionality enabling administrators to monitor user and subscription statistics, including total users, subscription users, and subscription growth percentages.

EDUCATION   📅 2020-2023

Bachelor of Computer Science & Engineering
University of Information Technology & Sciences(UITS)
Capston Project on E-commerce Web Application
